## Average Number of Registered Voters by Year

- Though 2015 is showing an increase of 396 in the total number of registered voters, the inactive number of voters has increased from 1,931 in 2014 to 4,152 in 2015. The reason for this increase in inactive voters is due to the two list maintenance processes that are run in the odd years, the National Change of Address, and the No Contact Process. The two processes attempt to make contact with the voter. If no response is received from the voter within 40 days of the attempt then the voter goes inactive. Due to the large number of no responses this year the inactive list has substantially increased. In addition to the list maintenance processes the Secretary of State will conduct a mass deletion of voters that are on the inactive list for more than two general elections. Though the office prepared for this deletion the Secretary of State did not conduct the deletion for 2015. Due to the scheduled deletion not taking place the number of inactive voters, as well as the total number of voters for 2015 is inflated.
